### II. Passage questions :

*Food can maintain or save a life. It can destroy life as well proper food serves the purpose of medicine. Improper food works as poison and cause diseases. We may take pride in calling ourselves civilized, but we float all the norms about the quality or quantity of food. We mostly eat processed foods. We have drifted away from mother nature. Thus the incidence of diabetes has increased very much. According to a survey, diabetes was rare in the natives of Canada a few years ago with the advent of processed and junk foods, the incidence of diabetes has shot up with in a very short time. By offering ice-creams chocolates and cakes too often to our children and by attending panics every other day, we in fact invite obesity and diabetes.*

- What is improper food?
- What is effect of improper food?
- How have we changed our food habits?
- What causes obesity and diabetes?

### III. Answer the following in short :

- What are the ingredients?
- What are the three categories of animals according to their eating habits?

### IV. Answer the following in brief :

- Do all living beings eat the same kind of food?

(OR)

Mention the advantages of sprout over seeds?
